

Northumbria University

"CA Building Products is top of the class at Northumbria University"

The complete metal building envelope for this Northumbria University Learning Resource Centre in Carlisle was supplied by CA Building Products.

Architects CAPITA dba specified metallic finishes throughout the building envelope ensuring a modern image, whilst a glass atrium opens up the building to the outside during daylight hours and allows the internal lights to illuminate the forecourt at night.

The Plano-Therm® metal secret fix, rainscreen system in metallic silver aluminium composite material (ACM) is emphasised by a dark green aluminium rainwater system whilst the stucco-embossed River-Therm® secret-fix roofing solution gives complete walkability, excellent thermal performance and logical non-combustibility.
