An object lesson in quality from CA Building Products

CA Building Products have been specified as the perfect solution for new-build and refurbishment projects in a wide range of primary, secondary and university educational establishments.

Long-term renovations of the roof structures at the Universities of Bath and Belfast were completed with CA Building Products secret fix roof systems in mill finish and pre-painted aluminium.

A sweeping pale green curved aluminium secret fix roof along with high quality aluminium aerofoil and curved fascia was installed onto a new gymnasium at Kenilworth school, while King James 1 Arts College in Bishop Auckland received a facelift in the form of a silver coloured self-supporting entrance canopy made from 3mm powder coated aluminium.

CA Group provides a comprehensive choice of metal building envelope, rainwater management systems and specialist fabrications suitable for a wide range of project applications.
