

## Ferryhill Business and Enterprise College

An early lesson in business

**Project Type:** Refurbishment

**Scope:** Refurbishment of two school entrances

**Product:** Execa bespoke architecturally engineered panels

**Architect:** DEWJOC Architects

**Main Contractor:** MMP Construction (NE) Ltd

**Structural Engineer:** AMP Consultants of Darlington

**Cladding Contractor:** CA Group Ltd

*Execa architecturally engineered panels helped create a free-standing entrance canopy and an additional feature screen for Ferryhill Business and Enterprise College, County Durham in under 8 weeks.*

Bespoke architectural panels in bronze PVDF aluminium composite material (ACM), white pre-coated aluminium and polished stainless steel material were incorporated into the project.

CA Group undertook the design, manufacture and installation of the feature screen, designed to suggest an open book to fit in with the schools educational objectives and gave a

much-needed facelift to the outdated portakabin building.

CA also helped with the regeneration of the schools existing entrance, creating a stunning new free-standing canopy.
