

HFL Sport Science

No horse play from CA

Project Type: New Build
Scope: Specialist Cladding
Product: Plano-Therm®
Location: Cambridgeshire
Area: 200 m²
Materials: Green Grey polyester powder coated aluminium
Supplier: CA Building Products
Contractor: Specialist Cladding Systems

Specialist Cladding Systems have just completed a new installation of the Plano-Therm® secret fix rainscreen system from CA Building Products.

The development involved adding a plant room extension to HFL Sport Science's existing laboratory in Cambridgeshire.

The extension consisted of a 200m² Plano-Therm® construction in Green Grey polyester powder coated aluminium.

The project provided a number of challenges for Specialist Cladding Systems, the main being colour matching the new Plano-Therm®

modules on the extension with the existing rainscreen cladding on the original building.

As the Plano-Therm® system allows the designer flexibility to create traditional or unconventional aesthetics, utilising the broad palette of metals, colour and finishes, it was the ideal choice for this project.
