

Princes House

A stair tower fit for a prince

CA Building Products' new Plano-Therm® insulated rainscreen system has completed its debut project.

Specialist Cladding Systems' brief was to provide an economic, but high quality, flat insulated cladding system to the two-storey extension and the new lift shaft/stair tower at Princes House in Swindon.

The project consisted of the refurbishment of an existing building with the addition of a two-storey lightweight extension on the roof.

This was Specialist Cladding Systems' third job with George & Harding Construction Ltd, with a fourth - a refurbishment at Tower Hill in London - to come.
